So, what is Crown of Ash?

Crown of Ash is a strategic worker placement and area control game for one to four players. Players take on the role of vengeful necromancers, ambitious to rebuild and conquer the kingdom by using loyal minions (workers) to do their bidding!

Minions can gather the alchemical resources needed to raise powerful undead fighters to the ranks of your armies. They can build and improve structures to offer better resources and earn influence over the land. Or they can march your undead army into battle and seize control of other players' structures.

Over the 4 game rounds players will maximise their turns to earn the most influence points from the structures they control, the resource they possess and the fighters they raise. The player with the most influence at the end of the game will take control of the kingdom and rule for the rest of time.

Summary

Primarily it is a worker placement game, but...

What makes Crown of Ash different?

Well, it has elements of area control!

Like many areas control games, combat plays a major role in Crown of Ash and is key to gaining territory from other players. But the Combat has been specifically designed to remove the 'take-that' elements featured in many areas control games. Players are rewarded win or lose through the use of combat cards.

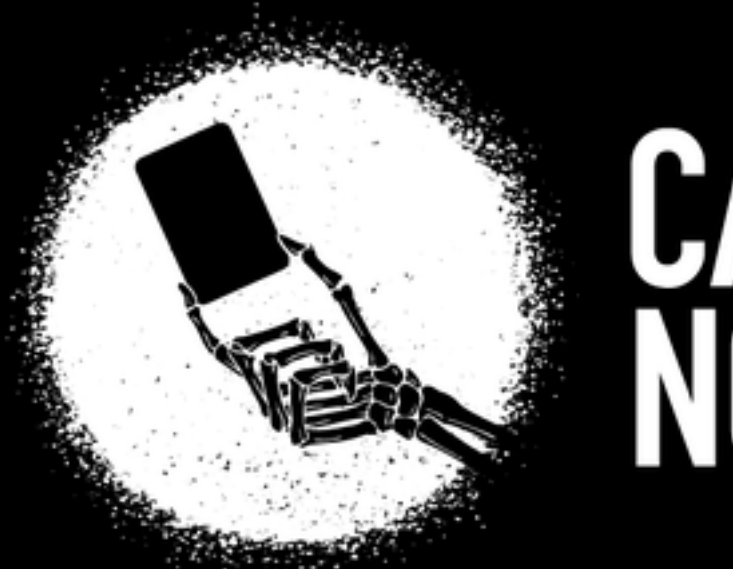

Each player has an identical set of 5 combat cards that bolster their attack score in battle, but also reward players for winning and compensate for losing. The weaker the combat card, the better the reward for winning. Often meaning that combat is nail-bitingly close. The stronger the combat cards is, the better the compensation for losing, avoiding the bad feelings of a hard loss but also making losing a viable strategy. It is this level of strategy that is key in Crown of Ash.

To give players more options on how to play, Crown of Ash also includes a AI player decks that can be used to play solo, but also added to 2 and 3 player games to buffer the conflict between players.

Players: 1-4

Ages: 12+

The AI decks are easy to use, but hard to predict, so make for formidable opponents. The AI acts just as any other player would, assigning their minions to worker spaces, attacking structures, raising fighters and gaining influence points. At the start of the AI's turn a dice is rolled to determine which regions of the board the AI interacts with. Then a card in the AI deck is flipped to reveal what action is taken. There are also 3 scales of difficulty allowing players to customise their experience further, which makes for some serious SOLO player challenges.

In CATAN (formerly The Settlers of Catan), players try to be the dominant force on the island of Catan by building settlements, cities, and roads. On each turn dice are rolled to determine what resources the island produces. Players build by spending resources (sheep, wheat, wood, brick and ore) that are depicted by these resource cards; each land type, with the exception of the unproductive desert, produces a specific resource: hills produce brick, forests produce wood, mountains produce ore, fields produce wheat, and pastures produce sheep.

All players have to work together to build the bridges and bring the rolling wobbly egg safely to the rescue boat at the foot of the mountain. Speed and teamwork are essential in this frantic, fun game for ages 6+, Save the egg and win the game!

Top score from me, the game's memory elements are just as much of a challenge for adults as it does for kids, and it encourages teamwork, which everyone can benefit from. Love Love this game, well done Kosmos you nailed it!
